INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US03/23070**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims <u>1-38</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-38</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-38</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 1-38 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest: Regarding claim 1,14,36,38 the nearest prior art as shown in Zheng fails to teach a method or apparatus comprising: means for keeping a running history, up to a predetermined length of power control instructions included in a first plurality of frames received on a first link of a channel, the first frames being grouped before their processing; and means for generating power control commands for a second plurality of frames to be transmitted on a second link of the channel, based on the running history the second frames also being grouped for subsequent processing in batch for transmission.

Regarding the "X" reference to Zheng, cited in the International Search Report, note that as is shown in the US family member of the cited reference (US 2004/0047329), Zheng's arrangement is directed to a power control process for single consecutive frames. As noted above, Zheng fails to teach the power control history being based on a first plurality of frames that are grouped before their processing and the history being used to control a second plurality of frames also grouped before subsequent processing.
